

Reporting on Section 6

Community and Town Councils

Environment (Wales) Act 2016 Part 1 – Section 6 The Biodiversity and Resilience of Ecosystems Duty

The Biodiversity and Resilience of Ecosystems Duty Report 2025

Name of Community or Town Council: Abertillery and Llanhilleth Community Council

Group: Group 1

Introduction and Context

Abertillery and Llanhilleth Community Council represents people of our local area at the grass roots level and covers five wards – Abertillery, Aberbeeg, Cwmtillery, Llanhilleth & Six Bells. We have approximately 11,422 people on the electoral register.

- For the 2023/24 financial year, council had an overall budget of £376,451 and a precept of £289,000. For the 2024/25 financial year, council had an overall budget of £431,131 with a precept of £381,131. For 2025/26, council has a budget of £464,023 with a precept of £434,023.
- ALCC is not responsible for any land, buildings or playgrounds. However, we always look to incorporate biodiversity into our decision making and look to integrate it into our policy making.

Action Report 2023 - 2025

NRAP Objective	Action carried out to...	Monitored by:
1	<p>-embed biodiversity into decision making & procurement</p> <p>Grant applicants are asked to consider and address biodiversity in their grant applications. Planning applicants have to consider the effects on biodiversity. For example, our Planning, Commerce and Environment committee (PlaCE) contacted the borough council with concerns over the development of new properties and any potential issues with excess water/draining issues on hardstanding's. To combat this, either the surface must be porous or permeable or designed as such that water runs off to a permeable or porous area within the boundary of the property.</p> <p>However, where there is an existing impermeable hardstanding to the front of a house which leads to a highway, there is an allowance to replace a small area (up to 5sqm) in any 6 months period without needing to comply to the restrictions above.</p> <p>We also have a number of planning applications for wind farms in the area and we have queried how this will affect local wildlife, for</p>	Clerks & Councillors.

		<p>example, bat and bird strikes and the disruption to nesting animals, the local habitat and migration routes.</p> <p>We choose to bank with Unity Trust. Unity Bank demonstrates a commitment to supporting biodiversity, particularly through its Unity Impact Grant program, which funds organizations focused on environmental protection and access to green spaces. Additionally, the bank emphasizes Environmental, Social, and Governance (ESG) goals and recognizes its role in protecting the environment.</p>	
	<p>-raise awareness of biodiversity & its importance</p>	<p>We have a Town in Bloom project which has been running from 2021. This has grown year-on-year and involves a lot of the community who have adopted tubs as part of the scheme.</p>  <p>This year, we entered the Wales in Bloom competition and this involved various community groups, local schools and councillors.</p>  <p>As a whole, the community has had good success with the competition and those who entered enjoyed taking part. The results are as follows – Abertillery Town – Silver Gilt Cllr. Ralph Henderson MBE – Wales in Bloom Community Champion, one of only 4 in Wales.</p>	<p>Clerks & Councillors.</p>

Ebbw Fach Community Group – It's Your Neighbourhood, Level 4 Thriving
Six Bells Hotel and Ty Ebbw Fach – both silver awards
Abertillery Learning Community – Level 3, Branching
Pentref Tyleri Community Group – Level 5, Outstanding for the second year running.

The school children have started growing vegetables and flowers in their own polytunnels. In 2024, we also designed and produced biodiversity leaflets to give to our community tub involvement partners which illustrated the effects of biodiversity and, the importance of wildlife and choosing native plants. This was done in conjunction with advice from One Voice Wales and resident Blaenau Gwent County Borough Council ecologist, Nadine Morgan.

A biodiversity working group has been established and will undergo appropriate training during 2026. This will be used in preparing our biodiversity plan.

Staff attended the official online launch of One Voice Wales's new resources for Biodiversity in May 2024 and also the Biodiversity and Ecosystems Resilience Duty training in April this year.

4

-tackle negative factors: for e.g. reduce pollution, use nature based solutions, address

In 2022, Council adopted a single use plastic policy. For recycling, we use split bins; metal & plastic and cardboard & paper. We also choose to recycle the plastic wrapping wherever possible and drop this off to a local collection point. We actively encourage all of our councillors to use a laptop wherever possible to stop the needless printing of documents and paper wastage.

Clerks & Councillors.

invasive
species

Councillors do voluntary work with Environment groups locally, and a part of that an invasion of Himalayan Balsam has been bought under control.

Lights, switches and computers are all switched off when not in use.

Council is in receipt of an annual £35,000 grant from the local Solar Farm company which we distribute back to the community through grants. The funding should be allocated to community projects which are sustainable, have a lasting legacy, are environmental in nature and are for wide community benefit.

One such recipient of the solar farm grant is Ebbw Fach Community Group when in 2023, they received £15,000. Part of the money awarded purchased an outdoor hub which provided a warm, safe, calming space where community members could meet and be encouraged to join in with the various activities they have in their gardens and community growing spaces. The group worked hard on a local area known as Aberbeeg Park & Woodland and worked hard to transform an overgrown ash tip to a peaceful space where people can immerse themselves in nature. This space went on to win the Community Green Flag Award 24/25, run by Keep Wales Tidy.

This year saw the removal of an established wildflower meadow that was originally planted with a grant from Keep Wales Tidy. The area was replaced by turf. This was a misunderstanding by one of our councillors and we are currently working with the councillor, the local community and OVW to buy new seed and reinstate the meadow. Below is how the wildflower meadow looked before and hopefully, it will look the same, if not better, once the seeds have been planted.

			
6	-support capacity and/or other organisations	<p>We invite organisations to our community events. For example, BGCBC Ecologist, Nadine Morgan, Gwent Wildlife Trust, Keep Wales Tidy & Animal Encounters.</p> <p>Councillors volunteer locally with Blaenau Gwent ecology team maintaining a leisure ground within the county. There is also volunteer activity with Gwent Wildlife Trust where the ecologists guide us in activities to maintain the biodiversity of several reserves and SSSIs. There is voluntary activity at a local church where efforts are underway to restore the grass areas in the cemetery to a wildflower meadow under the guidance of the County ecology team. These efforts help enhance our knowledge of the environment and how to enhance the biodiversity by natural methods.</p> <p>We want to work in partnership with organisations such as Local Places for Nature, Keep Wales Tidy and One Voice Wales to ensure we're on the correct track with biodiversity issues.</p>	Clerks

Review of S6 duty actions for 2023-2025

What has worked well?	<p>The Town in Bloom project, especially the community involvement scheme, has worked very well. Also, entering Wales in Bloom has been great as it's given residents the inspiration to ask questions on biodiversity, plants, flowers and nature. School children also love getting involved. The voluntary work with the ecology specialists enhances our knowledge and practical capabilities and confidence in recognising problems and implementing solutions.</p>
What have the barriers been?	<p>Implementing change. Biodiversity is more and more at the forefront of people's minds but this hasn't always been the case.</p> <p>Poor communication, for example the removal of the wildflower meadow.</p> <p>Having sufficient people available to deal with some of the tasks in a timely manner.</p> <p>As ALCC is not responsible for any land, it can be difficult to implement change.</p>
What will you change?	<p>We have established a biodiversity working group. This will give us a more focused group of councillors who are willing to learn and make change.</p> <p>Biodiversity group to undergo necessary training and produce a biodiversity plan during 2026.</p>
How and when will the s6 duty be monitored and the s6 plan reviewed?	<p>The next s6 review will be done by the end of 2028. Any goals will be monitored by both clerks and councillors alike to ensure we are moving forward.</p>

DRAFT

Group	Description of organisation relative to biodiversity. Organisations:	Minimum Actions	Examples	NRAP objectives for Action Reporting (see template Annex 1)
1	<ul style="list-style-type: none"> that own or occupy an office building only and whose functions are not directly connected to biodiversity and/or land management. 	Actions related to buildings management, procurement, sustainability, awareness raising, training, or in partnership with other organisations	Commissions, DVLA	NRAP objectives 1, 4, 6
2	<ul style="list-style-type: none"> that own, occupy or manage land their own buildings and grounds, whose functions are connected with biodiversity and/or land management, or that can influence those who own or manage land. 	As per Group 1 above PLUS grounds management, cascading funding criteria, providing education and training	Public Health Wales, Universities, Sport Wales	NRAP objectives 1,4,6 as above NRAP objectives 2, 3, 5 relating to own grounds
3	<ul style="list-style-type: none"> that own or manage land beyond their own grounds, whether their functions are connected with biodiversity and/or land management or not. 	As per Groups 1 and 2 above PLUS land management to maintain and enhance biodiversity, and promote the resilience of ecosystems.	Dŵr Cymru, Local Authorities, NRW, Welsh Government	All NRAP objectives

The **Nature Recovery Action Plan for Wales (NRAP)** sets out six objectives for reversing the decline of biodiversity which should be used to help develop and guide actions to comply with the section 6 duty:

The **6 objectives** to maintain and enhance biodiversity are:

- Objective 1:** Engage and support participation and understanding to embed biodiversity throughout decision making at all levels
- Objective 2:** Safeguard species and habitats of principal importance and improve their management
- Objective 3:** Increase the resilience of our natural environment by restoring degraded habitats and habitat creation
- Objective 4:** Tackle key pressures on species and habitats
- Objective 5:** Improve our evidence, understanding and monitoring
- Objective 6:** Put in place a framework of governance and support for delivery
